WHEAT

ANALYSIS

For the week, Chicago wheat closed \$.01 3/4 higher; Kansas City wheat closed \$.06 lower and Minneapolis wheat \$.14 1/4 lower. Last week, private exporters did not report any private sales.

Weekly export sales for all wheat showed a total of 11.1 mb (303,000 mt) with 8.9 mb (242,500 mt) for the 2016-2017 marketing year. This was below the 9.2 mb (249,100 mt) needed this week to be on pace with USDA's January demand projection of 975 mb. The winter wheat crop is now in dormancy until March when warmer temperatures bring wheat out of dormancy. Due to reduced supplies of spring wheat in the US and Canada this growing season, March Minneapolis wheat went inverted to pry grain lose from farmers hands. The market should remain inverted into the summer until the market gets a handle on new crop supplies and doesn't need to bid spring wheat from farmers any longer. The market is telling farmers to sell now and is giving them a better price than holding till the summer.

STRATEGY & OUTLOOK

Wheat futures are rallying into resistance which is a great time to make sales. COT report has turned bearish.

WEEKLY CHICAGO

WEEKLY KANSAS CITY

WEEKLY MINNEAPOLIS

COMPANY INFORMATION

Midwest Market Solutions is the leading edge in commodity marketing and trading. Midwest Market Solutions was established in March of 2002 and is a full-service commodity brokerage and marketing advisory service, clearing through R.J. O'Brien. Midwest Market Solutions does not necessarily take every trade recommendation listed herein. Hypothetical performance results have many inherent limitations, some of which are described below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown in fact there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk and no hypothetical trading record can completely account for the impact of financial risk in actual trading. For example, the ability to withstand losses or adhere to a particular trading program in spite of trading losses is material points which can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program, which cannot be fully accounted for in the preparation of hypothetical performance, results and all of which can adversely affect actual trading results.

This material has been prepared by a sales or trading employee or agent of Midwest Market Solutions and is, or is in the nature of, a solicitation. This material is not a research report prepared by Midwest Market Solutions's Research Department. By accepting this communication, you agree that you are an experienced user of the futures markets, capable of making independent trading decisions, and agree that you are not, and will not, rely solely on this communication in making trading decisions.
