

The following Regulation will be effective with all contracts after and including the May 2013 contract and will replace the current Regulation 2027.00. in the MGEX Rules and Regulations effective May 1, 2013.

2027.00. LOAD-OUT, STORAGE AND INSURANCE CHARGES: DELIVERY GRAIN.

Pursuant to **Rule 811.00.**, the Board of Directors has adopted this Regulation, effective with the May 2013 contract month.

The maximum load-out charges on delivery grain, which is tendered in satisfaction of a Hard Red Spring Wheat Futures Contract, shall be eight cents (8¢) per bushel for wheat regardless of the date of the warehouse receipt.

The maximum storage charges on delivery grain, which is tendered in satisfaction of a Hard Red Spring Wheat Futures Contract, shall be seven cents (7¢) per bushel per month or two thousand three hundred thirty three thousandths of a cent (\$.002333) per bushel per day for wheat regardless of the date of the warehouse receipt.

Insurance charges shall be included within the maximum storage charges.

The following Resolution will be added to the MGEX Rules and Regulations effective for all Hard Red Spring Wheat contract months after and including May 2013.

RESOLUTION 803.00.

Effective with the May 2013 contract month, all warehouse receipts issued for delivery against Hard Red Spring Wheat ("HRSW") futures contracts shall be marked with a deoxynivalenol ("vomitoxin") limit expressed in tenths as either (i) 2.0 parts per million or (ii) 3.0 parts per million. Warehouse receipts marked as 2.0 parts per million or 3.0 parts per million shall represent a maximum vomitoxin level. Further, warehouse receipts marked as 2.0 parts per million shall be delivered at contract price, while receipts marked as 3.0 parts per million vomitoxin shall be delivered at a 20 cents per bushel discount.

The taker shall have the option, at taker's expense, to request for a determination of the level of vomitoxin at the time load-out instructions are submitted to the warehouse. Sampling shall be conducted at the point of load-out by the Federal Grain Inspection Service, a federally designated inspection agency or by a third party inspection service which is mutually agreeable to the warehouse and taker of delivery. The determination of the level of vomitoxin shall be based on the average test results of the HRSW. Vomitoxin test results up to and including 2.0 parts per million shall meet warehouse receipts marked 2.0 parts per million. Vomitoxin test results up to and including 3.0 parts per million shall meet warehouse receipts marked 3.0 parts per million. Vomitoxin test results greater than 3.0 parts per million shall not be deliverable. There will be no rounding of test results to a whole number. Taker may agree to accept HRSW with vomitoxin test results greater than 2.0 up to 3.0 parts per million for warehouse receipts marked 2.0 parts per million at the stated discount or at a discount mutually agreed by both parties.

The following methods are to be used for determining the level of acceptable vomitoxin for deliveries against HRSW futures:

1. Barges shall be based upon a single barge composite sample.
2. Vessels shall be based upon the average of subplot composite samples.
3. Trains shall be based upon an average of 5 railcar composite samples. A single composite sample shall be used for load-outs less than 5 railcars.
4. Warehouse and taker may mutually agree to utilize other sample averages.

The following Resolution will remain in effect through the July 2012 Hard Red Spring Wheat contract month. For all Hard Red Spring Wheat contract months after and including September 2012 it will be removed from the MGEX Rules and Regulations.

RESOLUTION 803.01.

The Minneapolis Grain Exchange Board of Directors has adopted the following Resolution:

BE IT RESOLVED, that, pursuant to **Rule 803.01.**, the Minneapolis Grain Exchange Board of Directors shall require that, effective with the December 1998 delivery month, elevators declared regular to deliver Spring Wheat on MGEX futures contracts provide a certificate of U.S. origin for delivered Spring Wheat if specifically requested in writing by the taker of delivery at the time load-out instructions are submitted.

Approved by the Board July 10, 1997.
